The contents and information on the catalogue is for general purposes and is provided on an "as is" basis. The recommendations of level of strength are relative and completely depend on the nature of tools used for any attack. All safes can be broken open given sufficient time, tools, torch (basic or simple home tools), expert skill and access. All warranties, recommendations and representations of any kind are disclaimed, including the implied warranties of merchantability and fitness for a particular use. The company disclaims any claims, losses, demands or damages of any kind whatsoever including but not limited to direct, indirect, incidental, or consequential loss or damages, economic loss, or otherwise arising out of or resulting by reason or in consequence of any breaking open of any safes, video door phones, burglar alarm systems, or any theft, fire, robbery, fraud or other wrongful act done by any party with regard to safes, video door phones, burglar alarm systems. The specifications, prices and features of the product may be subject to change. The categorization of safes into 10X, 100X, and 250X signifies the relative strength and security of each safe compared to a standard wooden cupboard. This categorization is based on controlled in-house testing. We are certified under ISO 9001:2015, ISO 14001:2015, and ISO 45001:2018, demonstrating our commitment to quality, environmental responsibility, and occupational health and safety.

FOREWORD

Thank you for choosing Godrej as your security partner!

It has been our constant endeavour to provide our customers with certified security. Godrej has partnered with several certification agencies globally to provide you with unmatched security.

Our certification partners include VdS & ECB.S in Germany, CNPP in France, LPCB in the UK, UL in the USA, RISE Research Institute in Sweden and SABS in South Africa.

With more than 100 years of experience in the security equipment business, we have learnt to build trust and reliability. We do understand that the real test of a product is its resilience to successfully repel a real life attack. Godrej's security equipment has time and again proved its remarkable ability to resist and protect your valuables, when all other security measures have failed. As we reminisce our history, we have several such incidents on record - be it the unsuccessful burglary attempt in a private household in Essen, or the attack and looting attempt on a private property in Kuwait during the Gulf war, or a failed attempt in a famous food-chain outlet in London - our products have shown remarkable character and have proved one thing - they are very stubborn when it comes to an unauthorised and forced access!

Godrej has also been accredited with the Integrated Management System certification, which encompasses an ISO 9001:2008, ISO 14001:2004 & BS OHSAS 18001:2007 (Operational Health & Safety Assessment Series) - thus committing delivery of standard products under pre-defined quality and safety procedures, which are being continuously monitored and assessed by Internal & External audits.

Apart from being manufacturers of quality products, Godrej is renowned for its ethical business practices and its concern for environmental and social welfare.

We look forward to your support for our mission of "Securing Peace of Mind, at Home and at Work".

CHOOSING YOUR GODREJ SAFE

There are 4 steps to select the right safe for your home, business or organisation.

1 GRADE

Safes vary not only in size but also in the degree of protection they offer against attacks. This is the GRADE. Each GRADE is awarded an OVERNIGHT CASH RATING by insurance companies. The recommended rating for Godrej Safes are shown for each range. The rating for jewellery and valuables is up to 10 X CASH RATING. The recommended ratings are those normally awarded but it is important that you check with your insurance company or broker since the type of premises, location and other security measures may make a difference.

2 SIZE

In each grade there are various sizes. Choose the size you need. You should also consider the location of the safe and its weight.

3 LOCKING OPTIONS

All Godrej Safes come with keylock as standard. The two most popular options are dial or digital combination lock.

4 OPTIONAL EXTRAS

Consider what you wish to protect inside the safe. All Godrej Safes come with adjustable/removable shelves. Other options include

- Lockable Drawers
- Lockable Cupboards
- Extra Shelves
- Deposit Features

CASH, JEWELLERY, VALUABLES AND FIRE RATING

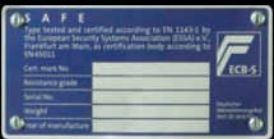

These icons help you to choose the right grade of safe.

The fire protection rating is indicated by the fire icon.

INDEPENDENT CERTIFICATION AND TESTING

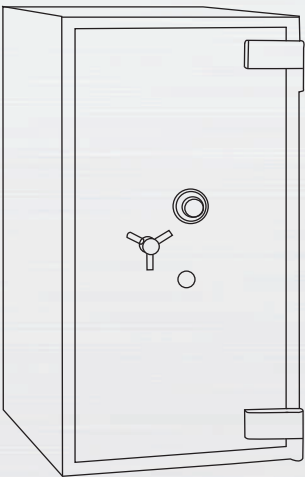

Every Godrej safe is independently tested and certified. Every safe carries the appropriate badge.

HIGH SECURITY

FIRE & BURGLARY RESISTANT SAFES & VAULTS

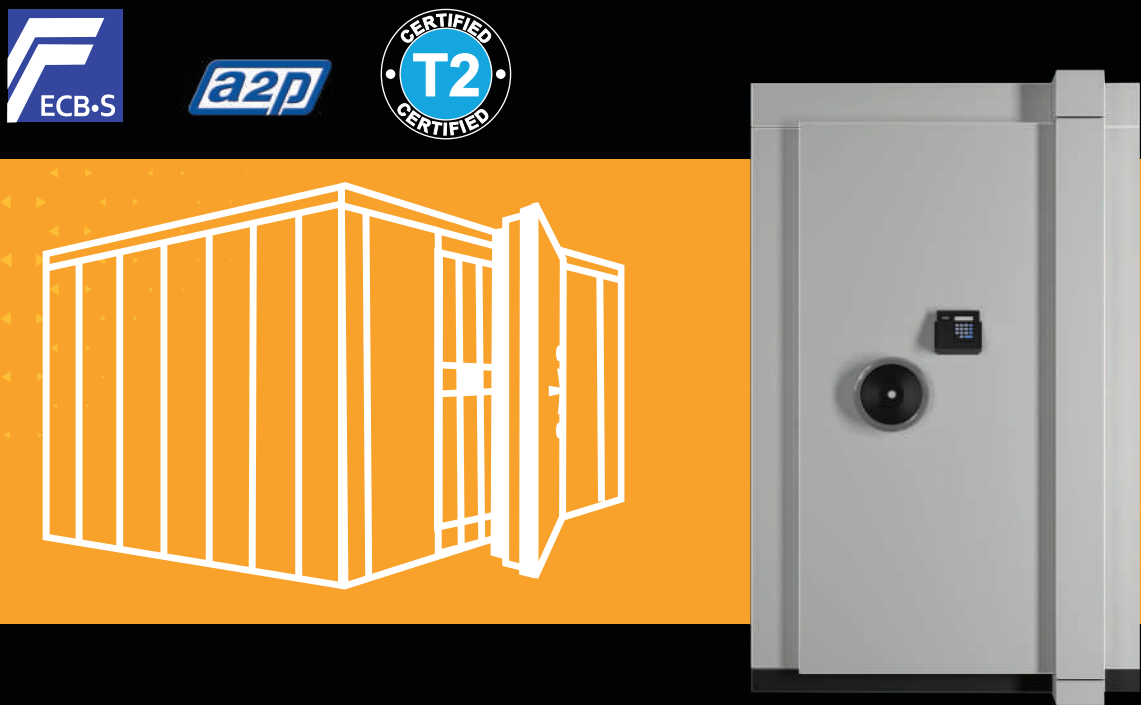

EN 1143 - 1

STANDARDS FOR FREE STANDING SAFES, ATM SAFES, STRONG ROOM DOORS & STRONG ROOMS

Secure storage units are the last line of defense in any security architecture. A poorly designed or an untested/uncertified storage unit poses a very high risk for the security of your valuables. The EN 1143-1 standards have been specially designed to replicate and test various forms of torch, tool and explosive attacks on a secure storage unit. Apart from being a very practical and scientific approach of ensuring the security of the product design, these tests and standards have evolved over the years to simulate real life conditions of forced entry into a secure storage unit.

All certified secure storage units adhering to the European norms must conform to the EN 1143-1 standards.

DEMOUNTABLE VAULTS & STRONG ROOM DOORS - THE DEFENDER PRO SERIES

CERTIFIED SECURITY - EN1143-I, GRADES V - EX / VI - EX / VII - EX / VIII - CD,EX / IX - CD,EX / X - CD,EX / XI - CD,EX / XII - CD,EX / XIII - CD,EX

EN1143-1, T2 OPTION FOR ALL GRADES

Compact & Modular : The Modular construction of the Strong Rooms offer a compact solution for a room-in-room system, which can be installed in existing rooms, by means of dry construction techniques. The system also offers portability and flexibility to remove and re-use at a later date. The compact walls also ensure better space utilisation and therefore, an attractive option for providing high security to your valuables.

Ultra High Certified Security : The Strong Room elements and doors are subjected to rigorous test attacks using a combination of Mechanical Tools, Power Tools, Torches, Thermic Lances, Diamond Core Drills, Solid Explosives etc., and assure you of the best protection in its class. Tested at some of the finest test laboratories, and certified by ECB-S Germany, the Strong Rooms assure you of the highest level of security.

Light Weight Construction : The Modular Strong Room elements are fabricated with the latest Torch, Tool, Drill and Explosive resistant barrier technology. The modern light weight barrier ensures slimmer walls for the panels and doors, reducing the overall floor loading and thereby, the need for additional architectural re-inforcements.

Widest Range : Godrej provides a wide range of certified Security - the resistance grades offered are Grades V/ V EX, VI/ VI EX, VII/ VII EX, VIII/ VIII EX, CD, IX/ IX EX, CD, X/ X EX, CD , XI/ XI EX, CD, XII/ XII EX, CD, XIII/ XIII EX, CD. T2 OPTION AVAILABLE FOR ALL GRADES

Attractive Finish Options : The Strong Room elements are supplied in Primed Finish to allow you the flexibility to modify as per your interiors. The Strong Room Doors may be finished with a superior quality paint finish or may be completely clad with Stainless Steel.

HIGH SECURITY

DEPOSITORY SAFES

EN 1143 - 2

STANDARDS FOR DEPOSIT SYSTEMS

Deposit systems are characterised by depository slots, which enable users to deposit cash & other valuables inside the safe without opening the safe door. The same slot however, makes the safe vulnerable to various forms of phishing and trapping attacks, and a poorly designed slot allows easy access to the contents inside.

The European Security standard for Deposit Systems EN 1143-2, explicitly incorporates testing for unauthorised access through the deposit input unit, apart from simulating other forms of torch, tool, gas and explosive test attacks on the safe.

All certified depository systems conforming to the European norms must adhere to the EN 1143 - 2 standards.

DEPOSITORY SAFE - GRADE 'D-I'

*Top coffer not part of standard safe

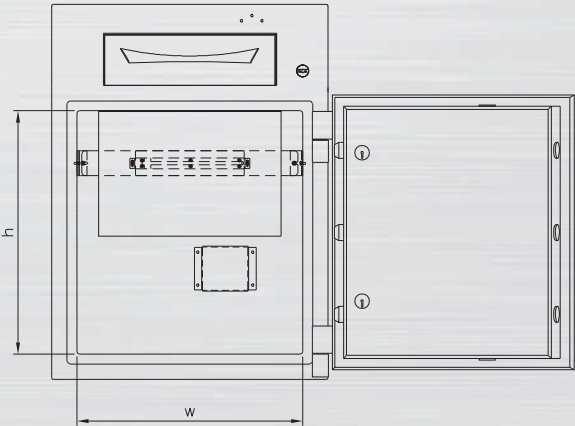

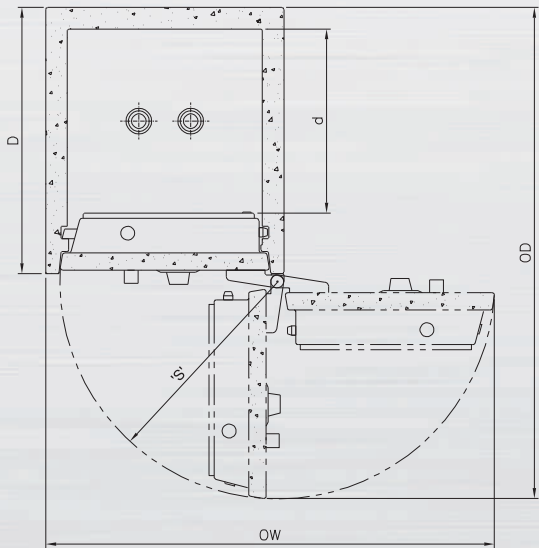

Features

- Tested and certified by CNPP - France & ECB.S - Germany, as per EN 1143 - 2, Grade 'D I'
- Contemporary light-weight design and construction
- The depository drawers are mounted on smooth heavy duty runners, which have been subjected to a life-cycle test of more than 100,000 operations
- The deposit system is capable of receiving envelopes and bags which are upto 50mm thick and with dimensions not exceeding a standard C5 envelope
- A rigorously tested anti-phishing system in the safe [as per the EN 1143 - 2 standards] ensures security of deposits at all times
- Access to the deposit unit is further restricted to authorised users only by a high security EN 1300 certified Class B Double Bitted Key Lock. As an added option, the High Security Key Lock may be replaced by a High Security Digital Electronic Lock with additional features like Multiple User and Manager Codes, Time Delay, Time Locking, Audit Control, etc. to monitor and control the drawer openings

DEPOSITORY SAFE - GRADE 'D-V'

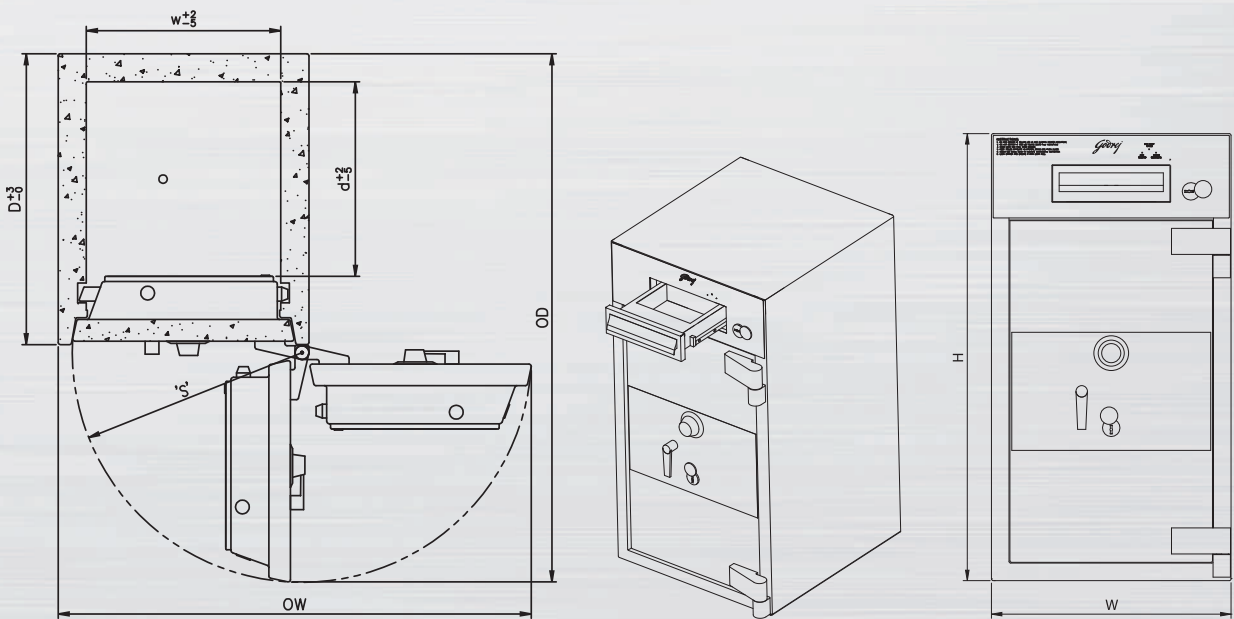

Features

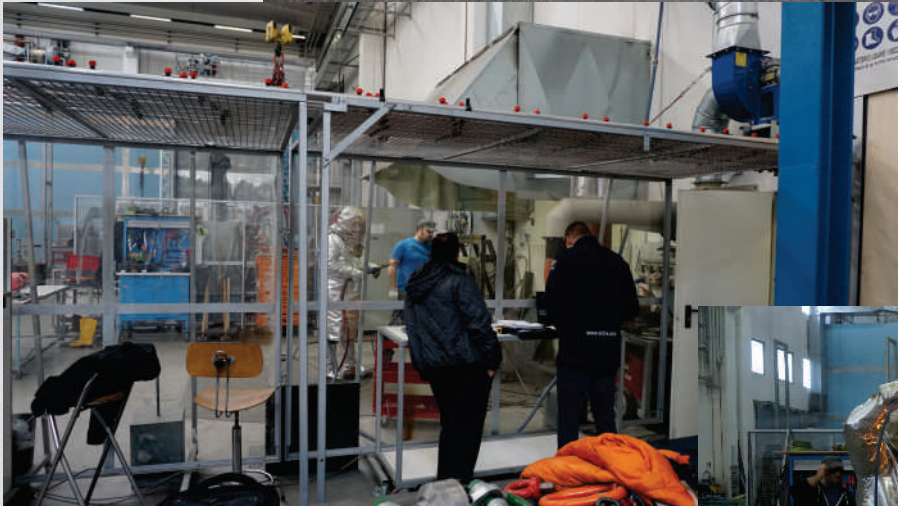

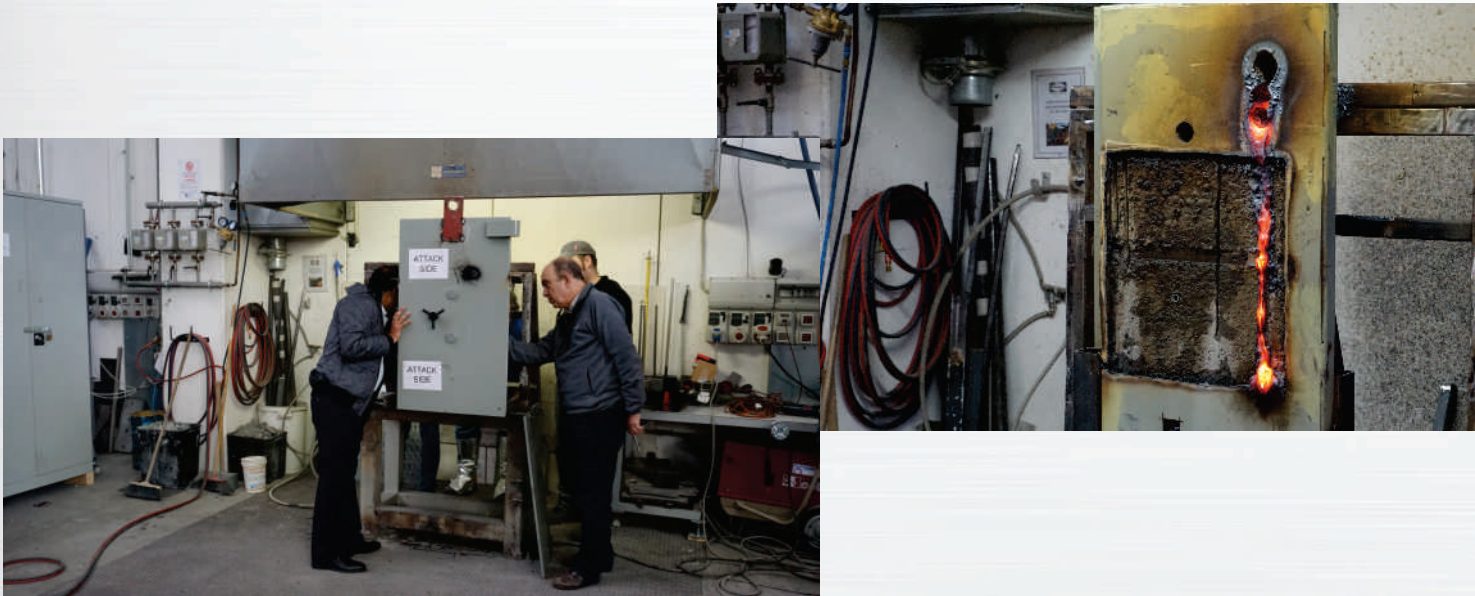

- Tested and certified by CNPP - France & ECB.S - Germany, as per EN 1143 - 2, Grade 'D V'
- Contemporary light-weight design and construction
- The depository drawers are mounted on smooth heavy-duty runners, which have been subjected to a life cycle test of more than 100,000 operations
- The deposit system is capable of receiving envelopes and bags which are upto 50mm thick and with dimensions not exceeding a standard C5 envelope
- A rigorously tested motorised anti-phishing system in the safe [as per the EN 1143 - 2 standards] ensures security of deposits at all times
- Access to the deposit unit is further restricted to authorised users only by a high security EN 1300 certified Class B Double Bitted Key Lock. As an added option, the High Security Key Lock may be replaced by a High Security Digital Electronic Lock with additional features like Multiple User and Manager Codes, Time Delay, Time Locking, Audit Control etc. to monitor and control the drawer openings
- High level of electronics & intelligence integration - The integrated electronics inside the safe allows for network connectivity on the built-in TCP/IP LAN port; multiple ports are also available for local printer, barcode scanning and GSM module connectivity

BESPOKE SOLUTIONS - CERTIFIED SECURITY

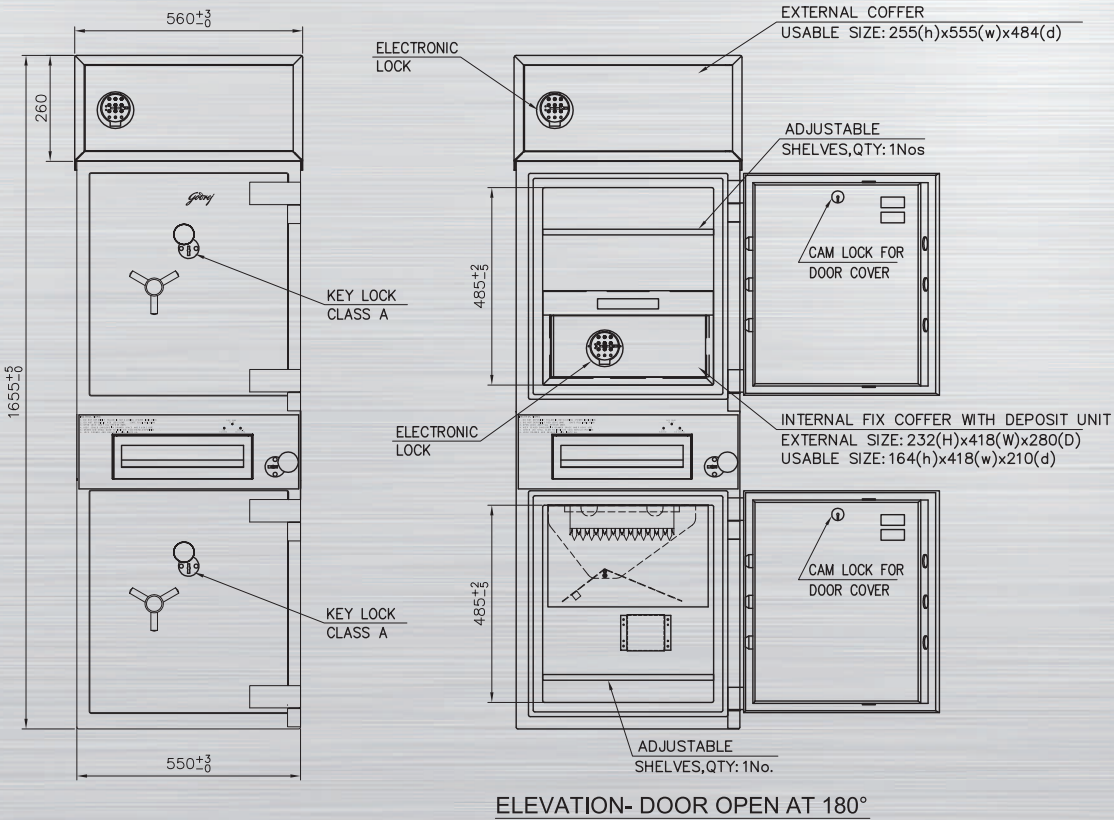

We realise the need for offering customised solutions - we have a large range of certified Bespoke Safes, which cater to various needs for secure storage.

Features

- Certified Security even for Bespoke Safes
- Wide range and options available to provide tailor-made customer solutions
- Dedicated design team to cater to Bespoke Safes
- Design -> Prototype -> Delivery -> 8 weeks
- Satisfied Clients - Food Chains, High Street Retailers, Pharmacies, Super Luxury Stores etc.

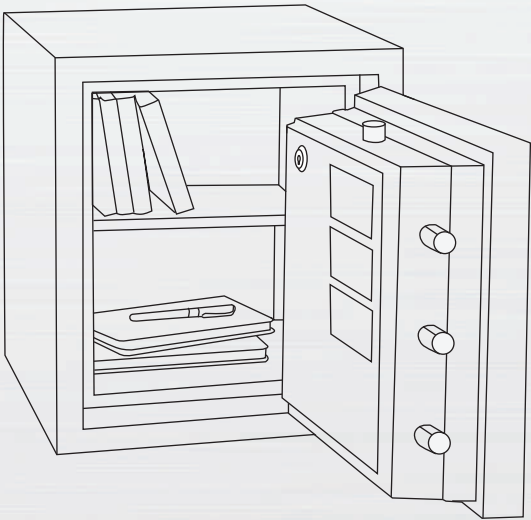

Special Depository Solution - Grade 'D 3' - safe on safe construction

MODERATE SECURITY

**FIRE & BURGLARY
RESISTANT SAFES**

EN 14450

STANDARDS FOR SECURE SAFE CABINETS

The private home sector has witnessed the largest number of burglary attempts in Europe. Poorly designed, untested and uncertified products have been convenient picks for users in this segment mainly for price considerations. The need for certified security was recognised to prevent huge revenue losses to both the private individuals as well as the Insurance bodies.

The EN 14450 signaled a paradigm shift for this sector, from untested security to certified security.

The standard replicates attacks by most of the tools used in domestic burglaries like power drills, crow-bars, grinders, etc., in laboratory conditions, so that the tested product may provide the required security level in a real life scenario.

Secure safe cabinets as per European norms must conform to the EN 14450 standards.

EUROLITE SAFES - VDMA B SERIES

Features

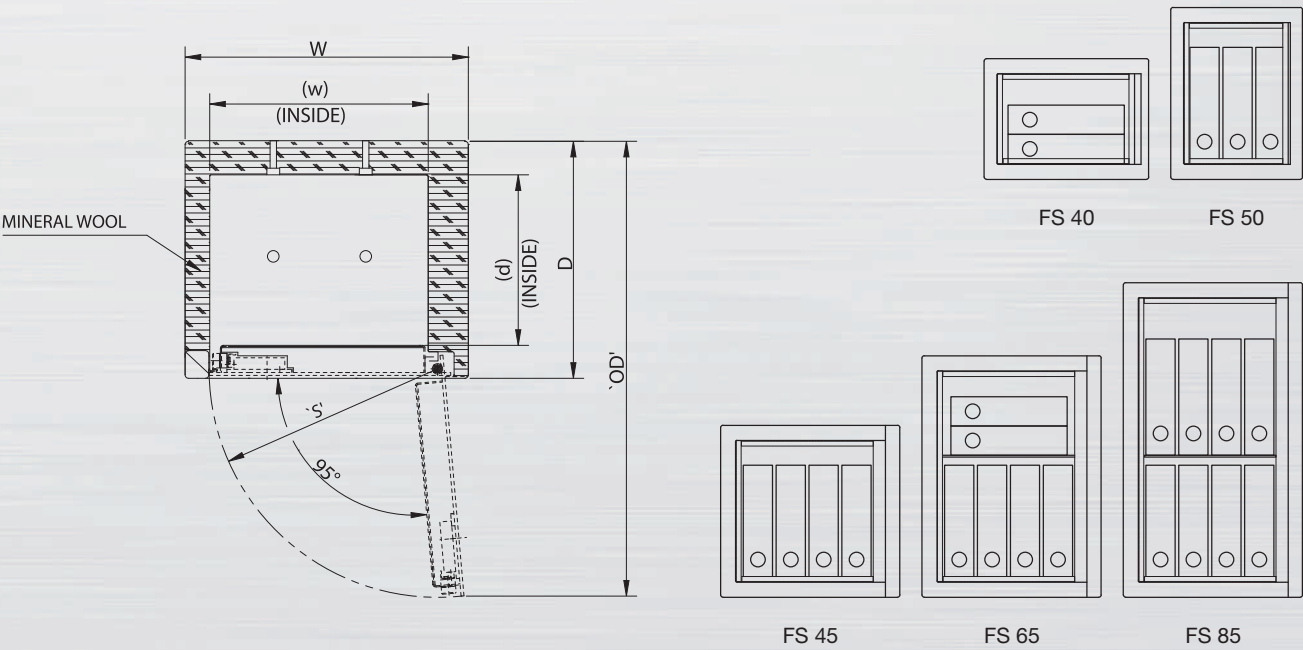

- Tested and certified by LPCB - UK, as per EN 14450: S2 standards
- Conforms to VDMA - B [as per VDMA - 24992, version May 1995] standards*
- Light-weight construction designed for home and high-rise installation
- Fire Resistant In-fill material conforming to DIN: 4102-1 standards
- Two fixings in the rear and the base of the safe - tested to 30KN pull force to ensure secure anchoring to the base or rear wall
- Fitted with an EN 1300 certified Double Bitted Key Lock as standard
- Overnight cash cover - €5,000

(The above cash cover rating is recommended rating for Private Sector use. The recommended cover for jewellery will be usually 10 times the recommended cash cover. However, these are indicative overnight cash & jewellery covers only and may vary across geographical locations, depending on statutory compliance requirements and local laws. Insurers may assign different values to the one recommended above.)

* The VDMA 24992 Class A & B specification standards have been officially withdrawn w.e.f. 31st December, 2003.

MODERATE SECURITY

FIRE RESISTANT CABINETS

STANDARDS FOR FIRE RESISTANCE OF SECURE STORAGE UNITS & CABINETS

Fire safety of your secure storage unit is of paramount importance. Fire has the destructive capability to ravage through your secure storage unit if it's not properly designed to provide fire protection. The EN 1047 and UL 72 standards have been perfected to replicate real life fire incidents in laboratory conditions.

The units tested are subjected to multiple forms of endurance, explosion and impact tests to prove their capability to withstand high temperatures [sometimes exceeding 1000°C], sudden fires, and the impact of falling debris during a fire accident. The EN 15659 and NT 017 standards have been similarly designed to test fire endurance and the protection the cabinets may offer with increasing temperatures.

An uncertified Fire Resistant product is as good as an unprotected cabinet.

DOCUMENT SAFES - FR SERIES

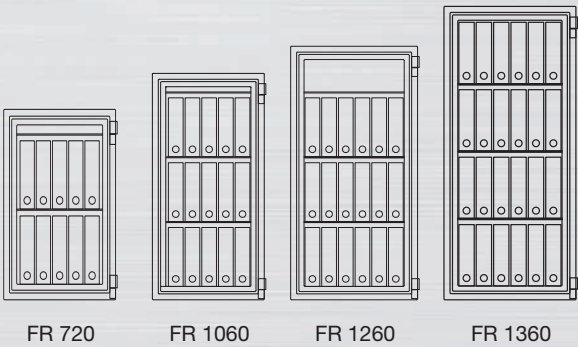

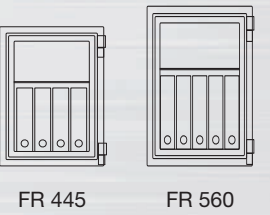

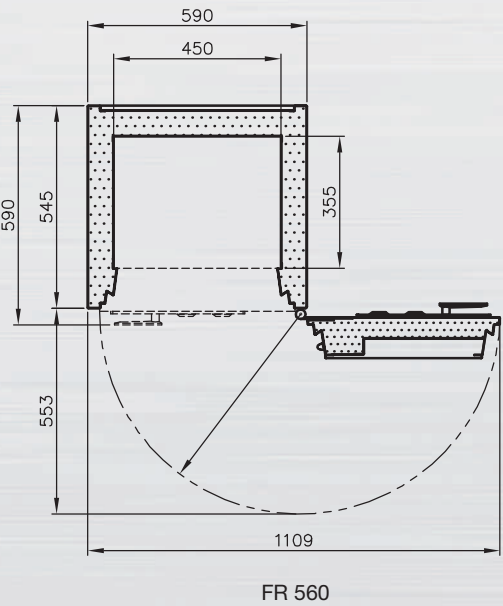

Features

- Certified by ECB.S - Germany
- Contemporary light-weight design and construction
- Unique snap shut mechanism in the door ensures ease of usage and high security to sudden fires
- A special tongue and groove construction between the door and door frame ensures higher resistance to industrial fires
- Option available for Digital Electronic Locks, certified as per EN 1300 standards
- Smooth powder coated oven baked structure finish ensures a very high level of product aesthetics
